Introducing the FlexiFund

Day-to-day healthcare needs can be unpredictable. While your Flexicare plan offers strong primary healthcare benefits, you may still face unexpected costs for things like additional medication, specialised tests, or provider fees. To help reduce these out-of-pocket expenses and give you more flexibility, your plan includes the FlexiFund a benefit designed to support your day-to-day healthcare needs and give you greater control and confidence in managing your health.

How the FlexiFund Works:

01 | Complete a health check

02 | Get up to R1,000 in your FlexiFund

Every year, each Flexicare adult member can earn up to R1,000 in their FlexiFund based on their health check results and Flexicare plan. The more health metrics that fall within the healthy range, the higher the amount earned.

Number of health check metrics in range	Flexicare Core FlexiFund	Flexicare Plus FlexiFund
5	R500	R1,000
3 – 4	R250	R500
≤2	R125	R250

Why the health check matters

The health check measures five key indicators: weight status, blood pressure, blood glucose, cholesterol, and smoking status. Clinical evidence shows that when these measures are out of range, mortality risk increases significantly. By understanding your results and identifying risks early, you can take meaningful steps to improve your health and wellbeing.

The following health check metrics will be taken into account when determining the FlexiFund value:

- A weight assessment
- Blood pressure
- Blood glucose
- Cholesterol
- Signing a non-smoker's declaration

03 | Use your FlexiFund

Member's claims are automatically paid out of the FlexiFund when there are no available day-to-day benefits.
